Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development site area of 0.2 hectares or below

Are there any priority habitats on or within 500m of your site?:

No

Can you evidence that you carried out a site assessment if the local authority disputes the presence of priority habitats?:

Yes

Please justify the reason why biodiversity net gain does not apply:

The application site is approximately 0.02 hectares (200 m²) and is therefore no larger than 0.2 hectares. No onsite priority habitat has been identified and the proposed development does not impact an onsite priority habitat. The development is therefore considered exempt from the Biodiversity Gain Condition under the exemption for development on sites no larger than 0.2 hectares. The application site and surrounding area were reviewed using the online Wildlife Assessment Check and available mapped environmental information. The assessment did not identify the application site as lying within a Special Protection Area (SPA), Special Area of Conservation (SAC), Ramsar site, National Nature Reserve (NNR), Site of Special Scientific Interest (SSSI) or Local Nature Reserve (LNR), and none of these designated sites were identified within 50 metres of the proposed development. The existing site conditions and nature of the proposed works were also considered. The proposal relates to the demolition of an existing concrete outbuilding and the creation of parking/hardstanding within an existing developed urban site. No priority habitat has been identified within the application site. The Wildlife Assessment Check report has been retained as supporting evidence. The applicant will also observe the precautionary advice contained within the Wildlife Assessment Check in relation to nesting birds during any relevant works.

Please read the help text for further information why developments may be exempt or not in scope.

The proposed parking and access works will not alter the existing waste collection arrangements for the premises.
