

TENNANT STREET

Notes:

Following the completion of the Derby Market Hall refurbishment works it has been identified that some of the retained doors at first floor, which provide access from the balcony to the Make & Trade Units, are restrictive to some building users. This has presented accessibility concerns for both tenants and customers when attempting to access these first floor premises.

This drawing indicates the doors which are proposed to be replaced with new asymmetric doors which reduce the opening force and provide improved clear opening widths to facilitate greater accessibility to the Make & Trade units
